Semester 1

- Ukrainian for Professional Purposes
- Introduction to Specialty
- Programming
- English Language
- Mathematical Analysis
- Fundamentals of Healthy Lifestyle
- Mechanics
- Fundamentals of Economics
- Algebra and Geometry

Semester 2

- Thermodynamics and Molecular Physics
- Chemistry
- Computer Graphics
- Historical and Philosophical Foundations of Social Development (module 2)
- Historical and Philosophical Foundations of Social Development (module 1)
- Programming
- English Language
- Mathematical Analysis
- Algebra and Geometry

Semester 3

- Mathematical Analysis
- Numerical Methods and computer Software
- English for professional purposes
- Methods of Mathematical Physics 1
- Electricity and Magnetism
- Differential Equations 1
- Fundamentals of National Resistance
- University Elective Catalog

Semester 4

- Methods of Mathematical Physics
- Numerical Methods and computer Software
- Practical Course in Foreign Language
- Elective F1
- Optics
- Differential Equations
- Fundamentals of National Resistance
- Classical Mechanics
- University Elective Catalog

Semester 5

- Methods of Mathematical Physics
- Atomic Physics
- Field Theory
- Elective F4
- Elective F3
- Elective F2
- Ecology
- Oscillations and Waves

Semester 6

- Human Rights and Freedoms
- Probability Theory and Mathematical Statistics
- Electrodynamics of Continuous Media
- Quantum Mechanics
- Elective F7
- Elective F6
- Elective F5
- Mathematical Modelling and Applied Open Source Software Packages

Semester 7

- Interdisciplinary Course Work
- Statistical Physics and Fundamentals of Solid State Physics
- Statistical Radiophysics and Optics
- Elective F9
- Elective F8
- Elective F11
- Elective F10
- Laboratory Session

Semester 8

- Fundamentals of Scientific Research
- Elective F14
- Elective F13
- Elective F12

- Bachelor Thesis
- Pre-Diploma Practice
